

As you visit different bridges today, find the information we ask for on this sheet. This will be useful when you start the Building Bridges CREST Challenge. Try to note as much as you can, even if you can't see how it will be important.

For each bridge you visit, note the following information.

What is the name of the bridge?	
When was it built?	
What type of bridge is it?	
What is it made of?	
How is it supported at either end?	
Does it have any supports in the middle? If yes, how many supports and what are they?	
How does the bridge withstand the weather?	
What is the maximum load it can take?	
Does the bridge have any special features?
